

THE BIN BOSS BY GL INDUSTRIES:

- ✓ State of the art bin fan controller
- ✓ Not only controls the fans to turn on/off based on the equilibrium moisture (EMC) but also monitors roof pressure for safety shutdown
- ✓ Monitors plenum pressure (below the floor) for an indication of grain drydown,
- ✓ Temperature monitoring cable in the bin shows progress of the dry down. Also you can set a max temp, if grain gets above that temp. fans will come on for hot spots.
- ✓ All on an easy to operate easy to read touch screen.

--Simply set your high and low moistures the establish your EMC bandwidth.

--Set your bin roof pressure to shut the fans down in case of vent freezeup.

--One unit can control more than one bin to save money on equipment.

--Easy to read and operate touch screen (2 sizes available) with PLC.

--Option to control low temp heater in high EMC situations available.
